

NovaSure – You Can Be Free of Heavy Bleeding

Do your periods last a long time? Is your bleeding so heavy that you need to change your pad or tampon every 1 – 2 hours? Do you often have to wear a pad AND tampon for more protection? If so, then you may be a candidate for the NovaSure procedure. NovaSure is a minimally-invasive, nonhormonal outpatient treatment alternative to a hysterectomy that utilizes a thin handheld wand to remove (ablate) the lining of the uterus. The procedure is quick (90 seconds) and effective (90% patient satisfaction) and most patients are back to work in 1 - 2 days. For more information, visit www.NovaSure.com.
